DE-014.63/AQ4/001/002 - ARQUITETURA - ESTAÇÃO LUIS GAMA  
IMPLANTAÇÃO

1 - PARA LEGENDA E NOTAS GERAIS, VER DESENHO N° DE-014.99/EL4/001

A technical drawing of a horizontal beam. The main view is a side elevation showing a long, thin rectangular beam with a central section that appears slightly wider or reinforced. At each end of the beam, there is a circular cross-section. The left circular end view shows a central point with radiating lines, possibly representing a bolt or a specific joint. The right circular end view shows a similar pattern but with more detail, including what looks like a flange or a mounting bracket. The beam is positioned horizontally across the page. The background of the drawing includes some faint, dashed lines suggesting a larger structure or environment.
